(54) Title: ELECTRONIC BRUSH POSITION DETECTION

(57) Abstract: The invention provides a method of activating an electronic paint (10). A first embedded position marker (20) in a first portion (14) of an image (12) written onto a first portion of the electronic paint (10) is scanned. A position of an electronic brush (30) is determined based on the scanned position marker (20). Image data is modified to embed a second position marker (26) in a second portion (16) of the image (12) based on the determined position of the electronic brush (30). The second portion (16) of the image (12) including the second position marker (26) is written onto a second portion of the electronic paint (10).
